# HÉTFA Research Institute Ltd.

---

HÉTFA is based in Budapest, working in public policy analysis, economic and social research, as well as in regional and urban development.

Established in 2009, today HÉTFA – composed of its two sister companies, Hétfa Kutatóintézet Kft and Hétfa Elemző Kft – works with approximately 40 internal staff members and 15-20 permanent experts. HÉTFA conducts research and analysis on regional, national and European level.

HÉTFA is a partner in several European research projects and also coordinates consortia in European and other international exercises, having a strong track record in policy evaluation and impact assessment on the national level as well as in European dimension.

## HETFA's expertise covers the following domains and tools:

### Division for Public Policy and Impact Assessment

- Research and public policy analyses in the following fields: social policy, labour and poverty issues, public and higher education, governance and public administration, taxation, entrepreneurship, competitiveness.
- Promotion of inclusion, gender equality and social entrepreneurship with social innovation
- Various evaluations (ex ante, interim, etc.) and impact assessments – macromodeling, statistical, qualitative and participative methods
- Preparing and developing of situation assessments, concepts, strategies, and programs
- Supporting development, introduction and application of analysis methodologies and guides
- Supporting institutional developments and structural changes
- Training and informative activities related to the operation of public policy

### Climate and Sustainability Lab

- Research and analysis related to climate change, sustainability, green energy transformation, green mobility, short supply chains in the agrifood sector, waste management and reduction of waste
- Qualitative research methodology is complemented by quantitative tools and an adapted macromodel
- The Lab developed its own beyond-GDP indicator system to measure sustainability trends in the EU/CEE region

### Division for Urban and Regional Development

- Research, analysis and evaluations related to regional development, urban/rural development issues, economic geography and related topics
- Strategy preparation, evaluation and feasibility studies for urban/local/regional policies for economic, cultural, touristic, green or brownfield developments
- Studies related to strengthening the local societies, communities, economies, labour markets.
